

MR CRAIG RUBINSTEIN
COSMETIC SURGERY FOR WOMEN

DEDICATED TO WOMEN

WE EMPOWER WOMEN TO CHOOSE WHAT IS BEST FOR THEIR BODIES

Photographs of actual patients who have had these procedures.
Results may vary from person to person.

Mr Craig Rubinstein and Dr Jane Paterson, trained and qualified in plastic, reconstructive and cosmetic surgery have made the decision to dedicate themselves to the specialization of cosmetic breast and "tummy" surgery.

Craig and Jane believe that although choosing a plastic surgeon can be overwhelming, it is critical that your doctor should be experienced in the procedures you desire. Your surgeon should explain and advise what is most appropriate for you but also perform the surgery with skill and continue to look after your needs until desired results are achieved. Craig says, "Women tell us they want to be feminine, in proportion and look good in clothes. By specializing in cosmetic surgery for women we believe we assist women to become better informed to make one of the most significant decisions of their lives".

For breast enlargement or reduction, breast lift, abdominoplasty or liposuction, Craig and Jane educate and guide each individual patient towards results that are realistic and natural looking.

At Cosmetic Surgery For Women, Craig and Jane know how cosmetic/plastic surgery can be a positive, life-changing experience, enhancing self-esteem and confidence. Craig and Jane help patients to make a realistic and well informed decision about how plastic surgery procedures can enhance their body and achieve results they may have secretly desired for years.

In addition to personal consultation, regular seminars are held which offer a great opportunity to learn and help you decide which of these surgeries may be suitable for you.
